WALL MURALS

Mural / Poster

1. Select panel number 1.

2. Lay panel face down on a flat surface. Apply the wallpaper paste evenly to the back of the panel, allow the paste to soak for 5 - 10 minutes, do not lay the pasted sheets on the top of each other. It is very important to take extra care to make sure paste is applied to the edges. Try not to get paste on the printed side, apply the panel on to the wall using a soft cloth. Work from top to bottom and left to right taking extra care not to overwork each panel. If one of the panels gets too wet or overworked by repositioning, it will stretch and make lining up the pattern most difficult.

3. Carefully remove excess paste from the front of the poster using a soft cloth. Too much rubbing or cleaning will remove the ink from the paper.

4. Repeat steps for remaining panels, following the printed guidelines on each panel overlap all joining edges by approximately 5 - 8mm. It is common for each panel of a wet poster to be around 106cm, larger than a dry panel of the poster as each panel expands once paste is applied.

5. Trim the excess edges (5 - 8mm) carefully when you stick 2nd panel and remain panels.
